Solar Irrigation System Installation in the Cook Islands

Overview

Why is solar power important in the Cook Islands?

Solar power to run the system ensures sustainability and low running costs,” Maa, an agricultural entrepreneur on the island of Rarotonga in the Cook Islands, told IPS. The SMART AgriTech Scheme, which was launched in July 2020, is one way the Cook Islands government has responded to the pandemic with a long-term vision.

How does the Cook Islands compare to other SIDS?

Similar to other SIDS, the Cook Islands has limited arable land and finite water resources, while agricultural production has declined in recent decades and food imports increased.

How much does food cost in the Cook Islands?

The average value of food production in the Cook Islands declined from 231 US dollars per person in 2002 to 43 dollars per person in 2018, according to the United Nations’ Food and Agriculture Organization (FAO). Meanwhile, food is the second largest expense for islanders, amounting to 22.5 percent of household spending in 2016.

What is hydroponics & how does it work in Rarotonga?

Hydroponics is a form of horticulture where crops are grown in an indoor environment with their roots immersed in a nutrient-rich aqueous solution. Some benefits of this technique are that it doesn’t use soil and minimises the use of land and water. On Rarotonga, agriculture accounts for a major 40 percent of all water usage.
