How does a solar combiner box function?

A solar combiner box binds multiple strings of photovoltaic (PV) modules into one standard bus. It connects the strings to the PV inverter. According to Northern Arizona Wind & Sun, for solar combiner boxes between 12 and 48 volts, it's a must to use breakers in place of fuses.

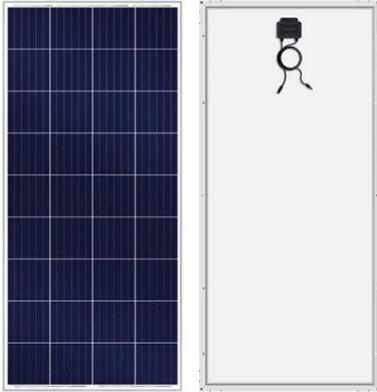

How do I install a solar combiner box?

To install a solar combiner box, first mount the solar charge controller on top of the solar battery bank. Then, connect the solar panel to the combiner box, and the combiner box to the solar charge controller.
