

EQACC SOLAR

Solar container communication station battery trading

Overview

What is CIMC Yangzhou base battery swapping station/new energy vehicle containerized power station?

CIMC Yangzhou Base Battery Swapping Station/New Energy Vehicle Containerized Power Station consists of several container modules, suitable with various brand new energy cars and battery systems, integrated with battery storage, battery charging, car moving, and internet communication system.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why do you need a solar container?

Deploy power in hours Perfect for remote locations, construction sites, events, and emergency response situations. Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere.

What is battery swapping station?

Battery Swapping Station is an energy station that provides charging and quick replacement of power batteries for electric vehicles. Power change mode has a natural advantage over the traditional charging mode.

Battery Swapping Station
Advantages Battery Swapping Station
Scheme Features Battery Swapping

Station Battery Change Process1. Electric Pan Trolley Take Battery Electric vehicles drive into Battery Swapping Station, automatically calibrate vehicle position via rails and tire slots on the floor, stop power off and confirm data, and enter the fully automatic battery change operation process.2. Palletizer Replacement Battery Wait for the palletizer on the station to receive the signal that the electric pan trolley reaches the designated station, remove the battery-free from the electric pan trolley.
