What is ESS & how does it work?

ESS solutions capture excess energy when it is available to provide uninterrupted power when it's not. With up to 22 hours of energy storage, ESS' scalable, flexible solutions enable intermittent energy to provide baseload power to meet growing energy demand from AI data centers and an increasingly electrified society.

What is ESS Energy Storage?

With up to 22 hours of energy storage, ESS' scalable, flexible solutions enable intermittent energy to provide baseload power to meet growing energy demand from AI data centers and an increasingly electrified society. ESS' American-made solutions are rapidly deployable, available in months instead of years.

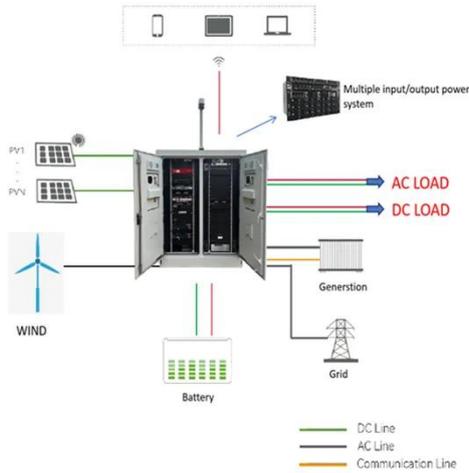

Who is Shanghai Zee energy storage technology?

Shanghai ZOE Energy Storage Technology Co., Ltd., established in 2022, is dedicated to providing global users with safe, efficient, and intelligent energy storage product system solutions. The company is headquartered in Shanghai, with its R&D center in C.

What makes ESS a great battery company?

ESS continues to lead the industry with a commitment to innovation, research and development that underpins every iron flow battery project. These awards underscore our commitment to powering data centers, companies and communities worldwide with clean reliable energy made possible with ESS' iron flow technology.
