

EQACC SOLAR

Solar container energy storage system factory in Singapore

Overview

What is Singapore's biggest battery storage project?

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia. The opening was hosted by the 200MW/285MWh battery energy storage system (BESS) project's developer Sembcorp, together with Singapore's Energy Market Authority (EMA).

What is Singapore's solar energy system (ESS)?

Built across two sites on Jurong Island, our ESS enhances Singapore's grid resilience by mitigating the impact of solar intermittency as the republic progresses towards achieving its 2030 solar target of at least 2GWp and energy storage systems deployment of 200MWh beyond 2025.

When will Singapore's energy storage system be completed?

EMA's Director of Industry Development Jeanette Lim said that the energy storage system had to be completed by December last year in order to provide energy, reserves and regulation services to enhance Singapore's grid resilience, to manage any protracted market and energy supply volatility.

Why should you install ESS / solar battery systems in Singapore?

This gives you greater energy control, cost savings, and reliability across any site type in Singapore. Integrating an ESS / solar battery system offers numerous advantages: Use more of the clean energy generated by your own solar panels instead of exporting it.
