Solar container lithium battery 3 6v cylindrical double

**LPR Series 19'
Rack Mounted**

Overview

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.

What is a 3.7 volt rechargeable battery?

This rechargeable battery at 3.7 volts offers broad compatibility across an array of devices such as LED lights, solar lights, loupes, speakers, icon lights, snap-on light, floodlight, motion light and numerous other electronic gadgets, provided the voltage and plug type are appropriate.

How long does a deep cycle lithium ion battery last?

A. Ionic's "Deep Cycle" batteries have true lithium capacity rating at 1C discharge rate meaning a 12Ah "Deep Cycle" lithium-ion battery will be able to provide 12A for 1 hour.

Solar container lithium battery 3 6v cylindrical double

The Ultimate Guide to Cylindrical Batteries

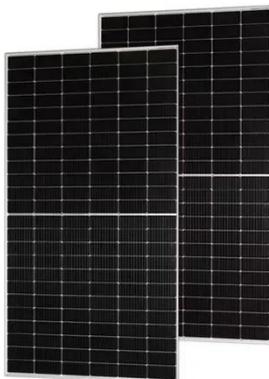

Here we summarize the cylindrical battery types, capacity, voltage, etc., so you can have a more comprehensive understanding of ...
