**Solar container lithium battery  
inverter output response is  
slow**

## Overview

---

What causes solar inverter battery communication problems?

Numerous factors cause solar inverter battery communication issues, some of which are engendered by personal negligence. Fortunately for us solar power enthusiasts, there are solutions to practically all battery communication issues affecting our solar inverter setup.

How does a solar inverter communicate with a battery?

Every solar inverter, excluding some grid-tied inverters, has distinct BMS protocols for communicating with the integrated battery system.

Communication protocols serve as the language that allows the data exchange between your inverter and the connected battery.

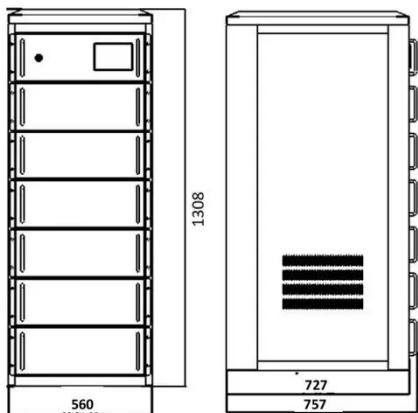

What causes battery communication problems in a solar power system?

There are several factors that can engender battery communication issues in your solar power setup. Below are some of the common ones: Faulty Wiring: A loose or damaged cable connection in the system can cause battery communication problems.

Why is my solar inverter not receiving accurate data?

The inverter, for example, may not be receiving accurate data from the battery and vice versa, leading to operational inconsistencies. The next step to take when facing such symptoms is to locate the root cause of the anomaly. There are several factors that can engender battery communication issues in your solar power setup.

## Solar container lithium battery inverter output response is slow

### Lithium battery and inverter troubleshooting

Hello all and I appreciate any help you guys may be able to provide. I recently purchased a Renogy 2000w pure sine wave inverter and a Redodo 200ah self heating lithium ...
