Solar container lithium battery sticker overpack

Overview

What is the difference between a lithium battery label and an Overpack?

The CAUTION label (lithium battery mark) alerts carriers and handlers that a package contains potentially reactive energy sources. An overpack—a larger outer packaging containing multiple smaller packages—must also display the proper markings to ensure compliance with UN3480 (batteries) or UN3481 (batteries packed with equipment) requirements.

What is a battery Overpack?

An overpack—a larger outer packaging containing multiple smaller packages—must also display the proper markings to ensure compliance with UN3480 (batteries) or UN3481 (batteries packed with equipment) requirements. Failure to use correct battery transport labeling may lead to customs delays, fines, or rejected shipments.

What is a lithium battery shipping label?

To meet global shipping standards, a lithium battery shipping label must include key regulatory markings, such as the Class 9 hazard label, UN number, handling warnings, orientation arrows, and other relevant information. Shipping lithium batteries isn't just about putting them in a box—it's about full compliance with international transport laws.

How to ship a lithium battery by air?

Follow packaging, labeling, and documentation rules carefully, train your staff, and check regulations often to ensure safe and compliant lithium battery shipping. You must use CAUTION & Overpack labels of lithium battery to meet the strict requirements for shipping lithium batteries by air.
