Solar container outdoor power at Funafuti Park

Overview

What is Funafuti's new solar farm?

The new solar farm, spanning several hectares and equipped with advanced photovoltaic technology, is designed to meet a significant portion of Funafuti's electricity needs. This project, funded through a combination of government resources and international grants, is set to enhance energy security and drastically cut carbon emissions.

Why is Feleti Teo launching a solar farm?

Prime Minister Feleti Teo underscored the project's significance in a recent address. "This solar farm is more than just an energy project; it is a symbol of our commitment to a sustainable and resilient future," Teo said.

How will a solar farm benefit the island?

The solar farm will reduce the island's dependence on diesel generators, which have been the primary electricity source, thereby lowering environmental impact and operational costs. Prime Minister Feleti Teo underscored the project's significance in a recent address.
