

EQACC SOLAR

Solar curtain wall installation in the UK

Overview

What is curtain walling installation?

Curtain walling installation is a very specialist job. It requires our installation teams to be of highly skilled engineers and technicians to ensure the project runs smoothly and safely. Curtain walling systems install panels into your building to create an attractive, modern, and functional look.

Why should you use solar shading in curtain walling?

In addition to our commitment to sustainable development, the solar shading solution that's integrated into curtain walling contributes to the comfort of users inside the building as well as the aesthetics.

Do you offer insulated panels within the curtain walling system?

If your building requires larger areas of glazing, with limited height and width, we can also offer insulated panels within the curtain walling system. From manufacturing and installation to maintenance and servicing. With over 30 years' experience in curtain walling, you're in safe hands.

How do curtain walling systems work?

Curtain walling systems install panels into your building to create an attractive, modern, and functional look. The glass panels can be used for both exterior and interior walls, as well as for skylights and other areas of the building. It's important to note that there are two types of curtain walling installation.
