

**EQACC SOLAR**

# **Solar curtain wall production unit**

## Overview

---

What is photovoltaic curtain wall?

Introduction: Photovoltaic Curtain Wall refers to a new type of building exterior wall system that combines solar photovoltaic power generation technology with building curtain walls.

What is a PV curtain wall?

The PV curtain wall is the most typical one in the integrated application of PV building. It combines PV power generation technology with curtain wall technology, which uses special resin materials to insert solar cells between glass materials and convert solar energy into electricity through the panels for use by enterprises.

How does a solar curtain wall work?

This system integrates photovoltaic components (such as solar panels) into the building curtain wall so that the curtain wall not only has traditional enclosure, decoration, and insulation functions but also can convert solar energy into electrical energy, providing green and clean energy for the building. Features□ 1.

How much does a PV curtain wall cost?

Purchase, installation, and O&M costs of the PV curtain wall systems (1 CNY = 0.1387 USD). The benefits of the systems derive from power generation and electricity savings for the air-conditioning system.
