

EQACC SOLAR

Solar energy 2400 MW

Overview

How much energy storage per MW of solar project paired with ESS?

Each awarded solar project will be paired with 0.5 MW/2 MWh of energy storage per MW of solar, as per tender conditions. The tender, floated under NIT No. 2025_NHPC_849707_1, invited bids for 1,200 MW of Inter-State Transmission System (ISTS)-connected solar projects, each required to be coupled with ESS.

How many mw can a solar project have?

Bidders were allowed to offer a minimum project capacity of 50 MW and a maximum of 600 MW in a single bid. The total capacity that was to be awarded was 1,200 MW. Solar projects that were under construction, yet to be commissioned, or already commissioned but selling power on a short-term merchant basis were eligible for selection under the tender.

Can NTPC provide solar power generators for 1200 MW ists-connected solar power projects?

NTPC has floated a tender for the selection of solar power generators for setting up of 1200 MW ISTS-connected solar PV power projects with 600 MW/2400 MWh (600 MW x 4 hours) energy storage systems (ESS) anywhere in India (solar-ess-01). The bidder needs to develop the project on a build-own-operate (BOO) basis.

How much ESS do you need for a solar project?

The awarded projects must include ESS with at least 0.5 MW/2 MWh for every 1 MW of contracted solar capacity. The developers can set up projects across multiple locations, with each project having a minimum capacity of 50 MW and a minimum ESS component of 25 MW/100 MWh.
