

## EQACC SOLAR

# Solar energy storage manufacturer roof

Voltage range

**636V-876V**

Rated voltage

**768V**

Cell type

**Lithium iron phosphate**

## Overview

---

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

Can a solar roof be used with a Powerwall?

Combine your Solar Roof with Powerwall—a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7. With the Tesla app, you can monitor your energy production in real time. Control your system from anywhere with instant alerts and remote access.

How does a solar roof work?

Glass solar tiles and architectural-grade steel tiles, vent covers and ridge caps come together to form a roof that is both durable and powerful. Combine your Solar Roof with Powerwall—a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7.
