

**EQACC SOLAR**

**Solar glass greenhouse supplier  
in Milan Italy**

## Overview

---

What is a bioclimatic solar greenhouse?

The bioclimatic solar greenhouse is the ideal design choice when creating a new environment that unites your house with the surrounding nature. Made in aluminium and glass, innovative and green in terms of design and use, the bioclimatic solar greenhouse is a unique space where you can spend a good part of the year.

Why is the greenhouse industry important in Italy?

The greenhouse industry in Italy presents a range of key considerations for prospective entrants. One crucial aspect is the regulatory framework, which includes EU agricultural policies and local environmental laws that govern land use and pesticide application. Understanding these regulations is vital for compliance and sustainable practices.

Are sunroom bioclimatic greenhouses eco-sustainable?

Sunroom bioclimatic greenhouses are also one of the most efficient solutions for taking advantage of solar energy and fall under the category of eco-sustainable architecture: like true passive solar systems, they can provide various advantages in terms of energy savings in the building.
