# **Solar glass panel stacking**

## Overview

---

What is a slide & stack glass wall?

Use Slide & Stack Glass Walls for storefronts or exterior facades that completely remove indoor/outdoor barriers during the day, but lock up securely after hours. The unique configurations and ease of operation of Slide & Stack Glass Walls makes them ideal for custom residential applications.

What is a 90° no-post slide & stack glass wall system?

Solar Innovations ® was approached by an architect to come up with a unique solution for a North Carolina home that wanted a better view of the outdoors. The solution was a 90° No-Post Slide & Stack Glass Wall System that would maximize views, break down the barriers between the outdoors and indoors, and provide an ideal entertaining space.

What is a slide & stack system?

Our Slide & Stack System is designed to accommodate multiple panels and typically ranges in sizes over 48 inches wide. While the wall is open, the panels stack into a parking bay. Panel parking bays can be parallel or perpendicular to the track, feature multiple bays, exist at one or both ends of the wall, or stack into a pocketed area.

## Solar glass panel stacking

### China Solar Glass Supplier

The solar glass panels are stacked and layered in a pallet or crate. The stacking process ensures stability and minimizes the risk of damage during transportation.
