Solar inverter cabinet access

Overview

Do you need a raised access platform for a solar inverter?

Safe and easy access is crucial for maintenance and potential repairs. This blog will guide you through creating a raised access platform for your solar inverter in the loft, ensuring both functionality and safety. Safety First: Building regulations often mandate a designated platform for accessing equipment like inverters.

Which inverter is suitable for control cabinet installation?

Installation Installation accessories Installation MOVIDRIVE® system application inverters are exclusively suitable for control cabinet installation according to the degree of protection. Installation accessories Type designation Part number Plastic cover Quantity MDX9_A-0460 - 0750-5_3-. 28243625 MDX9_A-0420 - 0570-2_3-.

How do I choose the right platform for my inverter?

Height: The platform should be high enough to clear any loft insulation while allowing comfortable headroom for working on the inverter. Building Regulations: If in any doubt consult your local building regulations to ensure your platform meets safety and weight capacity requirements. Materials: Choose chipboard or OSB (Orientated Strand Board).

Can I build my own inverter platform?

Custom Built: For a more tailored approach, you can build your own platform using timber. This option can work however requires some carpentry skills and due to the additional weight some knowledge of building regulations. Size: The platform should be large enough to comfortably access the inverter from all sides.
