Solar panels are super large

Overview

What is a large commercial solar panel?

Large commercial panels are designed for commercial and industrial installations. They can range from 77 x 39 inches to much bigger, custom-sized panels ideal for the very high, consistent energy needs of a factory or an office building. Solar panels come in three main cell sizes: 60-cell, 72-cell, and 96-cell.

What is a solar panel size?

Solar panel size is measured in watts (W) and indicates how much electricity the panel can produce under standard test conditions. Here's the key distinction every homeowner should understand: Most residential solar panels in 2025 come in three main configurations:

How big is a commercial solar panel?

Commercial and industrial solar panels are often larger than residential panels. The average solar panel size in a commercial application is approximately 78 inches by 39 inches with 96 cells. These 96-cell panels have an average panel output of 500 watts, making them more suitable for large-scale energy needs.

Should I buy larger or smaller solar panels?

Key Takeaways While solar panels have standardized sizes to help installation companies make installation easier, you can also order larger panels if needed. Larger solar panels offer more square footage to absorb sunlight and more solar cells, making them a more efficient option to solar smaller panels.
