Solar panels for houses

Overview

Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use?

Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

Can solar panels power a home?

Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens - sometimes hundreds - of thousands in savings over the warranty period of the panels.

Should you install solar panels on your home?

The benefits of installing solar panels on your home include energy cost savings, increased home value, cleaner air, and energy independence. While solar panels have a reputation for being expensive, they're actually much cheaper than grid electricity. The greatest hurdle to going solar is the process itself.
