Solar panels installed on rooftop in Podgorica

Overview

Is Montenegro a leader in rooftop solar energy?

In recent years, Montenegro, a small country on the Adriatic coast, has become an unexpected leader in rooftop solar energy. With more than 2,000 hours of sunshine per year, the country's natural potential has always been evident, but innovative policy design has truly driven adoption.

Can solar panels be installed on a roof in South Africa?

In South Africa, most houses have tiled, pitched roofs. However, there are a few other types, like metal or thatched roofs. Tiled and corrugated roofs are perfect for installing solar panels, but thatched roofs are highly flammable and it is seriously dangerous to have solar panels installed.

Does Montenegro need solar power?

In effect, Montenegro has ensured that the benefits of solar power – lower energy costs, protection from market volatility, and environmental gains – are available to those who need them most, but not only to affluent early adopters.

Will Montenegro's rooftop photovoltaics transform Red III?

Montenegro's nationwide rollout of rooftop photovoltaics, with thousands of prosumers integrated into the grid, illustrates precisely the kind of transformation envisaged in RED III. By early 2025, the rooftop capacity had approached 70 MW, with projections pointing to 100 MW by the end of the year.
