How big is a 200kW solar power system?

A 200kW system using 370W panels will require about 949.0 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 200kW solar power systems are mostly suitable for Businesses with very high energy needs. This size of solar power system is classed as "Large Scale".

How much space does a 200kW solar system need?

A 200kW Solar Kit requires up to 14,000 square feet of space. 200kW or 200 kilowatts is 200,000 watts of DC direct current power. This could produce an estimated 25,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

What is 200 kW on grid Solar System?

200 kw on grid solar system is widely used in grid side power generation, corporate power, hospitals, photovoltaic farms, community microgrids and other applications. We have installed PV projects in Germany, France, UK, Romania, UAE, Brazil, Australia, Jamaica and many other countries.
