

EQACC SOLAR

Solar roof lighting system

Overview

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

What is Chiko solar tile roof mounting system?

The Chiko Solar tile roof mounting system is designed as a modular unit assembly system with quality materials. Which enables an installer to install any module in almost any mounting situation or configuration. The components are easy to install and used for variety of tile roof types.

How does a solar roof work?

Glass solar tiles and architectural-grade steel tiles, vent covers and ridge caps come together to form a roof that is both durable and powerful. Combine your Solar Roof with Powerwall—a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7.
