

EQACC SOLAR

Solar solar container power supply system 12v

Overview

Can You Power a container with solar power?

You have a container. Let's power it with carbon-free, cost-efficient, plug-and-play, electricity. We are experts in solar energy. Our patent protected solar power units fits perfectly on top of 20' or 40' containers. No more hassle to get cost-efficient, green, energy to your containers. Containers are used for many purposes.

Why should you choose the solardrive container power unit?

In remote areas where fuel is difficult or expensive to access, or in situations where you appreciate the silence of solar power, we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators. Preserving foods after harvest is crucial for the economy and environment.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.
