

**EQACC SOLAR**

# **Solar tiles for rural house construction**

## Overview

---

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar roof tiles right for You?

Solar roof tiles are ideal for those who want the benefits of renewable energy without the traditional look of solar panels. Benefits include, but are not limited to: Lower energy bills: Solar panels reduce reliance on grid electricity, significantly cutting monthly energy costs.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Which solar tiles are right for Your House?

GB-SOL solar tiles – Located in Pontypridd, Wales, GB-SOL solar tiles are lighter than traditional tiles, at 3.5kg per slate, which means you could replace your roof without having to strengthen your property's structure. Solecco Solar – Solecco Solar offers tiles in eight different colours, from smooth grey to terracotta and old English dark red.
