

EQACC SOLAR

South Africa Off-Grid Solar Container Bidirectional Charging

Overview

What is EV charging in South Africa?

On 28 November 2024, CHARGE (formerly Zero Carbon Charge) launched the first renewable energy-powered EV charging station in South Africa. It relies almost entirely on solar and battery power.

Will South Africa have a solar-powered EV charging station in 2024?

In November 2024, South Africa launched its first off-grid, solar-powered EV charging station in Wolmaransstad. Here's what you need to know: CO2 Savings: Each station reduces 54 tons of CO2 monthly (equivalent to planting 1,200 trees annually). Fast Charging: 18 minutes for a 300km range using 480kW DC chargers.

Where is the first EV charging station in South Africa?

CHARGE has officially opened its first off-grid, ultra-fast, green electric vehicle (EV) charging station to the public in Wolmaransstad in the North West province. On 28 November 2024, CHARGE (formerly Zero Carbon Charge) launched the first renewable energy-powered EV charging station in South Africa.

Will South Africa's first off-grid charging station be a carbon-free future?

"We are thrilled to be officially opening our first off-grid charging station, which marks a significant milestone in South Africa's transition to EVs and a carbon-free future," said Joubert Roux, Executive Chairman of CHARGE.
