Overview

How much solar PV capacity does South Africa have in 2023?

Estimated South African rooftop solar PV capacity increased⁴¹ from 983MW in March 2022 to 4,4GW in June 2023, an increase of 349 percent.⁴² These figures need to be reconciled with those collected by SAPVIA. There is likely to be some overlap of solar PV imports across large and SSEG installations.⁴³

Does South Africa Import solar PV components?

Exponential growth in the uptake of solar PV has seen South Africa import billions worth of solar PV components over the last few years.

How big is solar PV in South Africa?

The most comprehensive recent study of the solar PV industry is the SAPVIA commissioned report concluded in October 2022.⁵⁰ Deployment of solar PV has grown substantially in South Africa since between 2011 and 2021 and even more rapidly on the continent, albeit off a very low base: from 0.01GW to 5.7GW and 0.27 to 10.3GW, respectively.

How can decentralized solar PV help women in South Africa?

Decentralized solar PV can offer significant opportunities for women, especially rural women as the off-grid solar PV value chain engages women both in delivering solutions and as beneficiaries.⁸² South Africa's greatest inclusion challenge is to address unemployment and poverty.
