# **South America wind power storage price per watt**

## Overview

---

How is the South America wind power market segmented?

South America wind power market is segmented by location of deployment. By location of deployment, the market is segmented into onshore and offshore. The report also covers the market size and forecasts for the wind power market across the countries in the region.

Is South America a net-zero energy country?

As of 2021, South America wind power consists of 100% onshore wind installations. The region had 29,754 MW of cumulative wind energy installations. The new Energy Transition Law of Colombia, enacted in July 2021, represents the government's commitment to achieving its climate change objectives and becoming a net-zero energy country.

How much does wind power cost in Brazil?

Wind power in Brazil has proved to be the most competitive technology, with an average price of BRL 98.62/MWh (around USD 30/MWh), well below the prices of large hydropower plants.

Which country has the highest installed wind power capacity in 2021?

In South America, Brazil had the highest installed capacity in 2021 and is expected to be the largest market during the forecast period, bolstered by constant growth in onshore wind power additions and upcoming offshore wind power projects.
