

South Sudan factory solar panels

Overview

What is a solar power plant in South Sudan?

Image: The recently launched 20MW solar energy plant in South Sudan.

Credit: Ezra Group A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes.

Does Sudan utilize solar energy?

Sudan is in the midst of energy transition after it lost its oil-rich south in a referendum in 2011. The country intends to contribute in combatting climate change affects and Sudan is in the midst of energy transition and has intended to contribute in combatting climate change affects, including the utilization of solar energy.

Will Sudan scale up solar power projects?

Sudan is also contemplating scaling up projects on solar power in the coming years. Most of Sudan's electricity generation comes from hydropower, and more than half of the Eastern African region's total oil-based capacity is located in the country. Sudan is also contemplating scaling up projects on solar power in the coming years.

How much power can a 20MW solar plant produce in Juba?

The 20MW solar plant can generate sufficient power to supply electricity to up to 16,000 households in Juba, significantly reducing energy costs and bolstering grid reliability, said the project's developer.
