

EQACC SOLAR

Spanish outdoor power trial battery

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

Overview

How will battery storage work in Spain?

Following its launch in Italy last year, the business will deploy battery storage in Spain, driving progress towards the country's 2030 clean power target and deployment goals for renewable energy. Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero.

How many storage batteries will Iberdrola install in Spain?

Iberdrola España will install six new storage batteries in Spain with a capacity of 150 MW. The projects will be built in Castilla y León, Extremadura, Castilla La Mancha and Andalusia, and each battery will have 25 MW of power and a capacity of 50 MWh.

Why does Spain have no batteries?

Spain has allocated €700M through the European Regional Development Fund (FEDER) funding for standalone batteries. April's blackout exposed the urgent need for increased grid stability. Why Spain has no batteries: Historical barriers

1. Robust grid management.

Where will a battery be installed in Spain?

In Castilla y León, a battery will be installed in Revilla Vallejera (Burgos), where Iberdrola España completed its first hybrid wind-solar plant in Spain in 2023. Extremadura will have two new batteries. The company will install two batteries in the province of Cáceres, where the C. Arañuelo I and II photovoltaic plants are located.
