

**EQACC SOLAR**

# **Standard for Portable Emergency Power Supply**

## Overview

---

What is an emergency power supply system?

power system (3.3.3). It is independent of your primary source of power, ready to operate in case of power failure. Within the confines of this particular whitepaper, when we refer to an EPS, we are talking about supply system (EPSS) Your emergency power supply system (EPSS) refers to your functioning backup power.

What is the NFPA 110 standard for emergency and standby power systems?

NFPA 110 NFPA 110 Standard for Emergency and Standby Power Systems, defines how emergency and standby power systems are to be installed and tested. It contains requirements for energy sources, transfer equipment, and installation and environmental considerations. It divides Emergency Power Supply Systems (EPSS) into Types, Classes, and Levels.

What are the NFPA 110 requirements for emergency power supply systems?

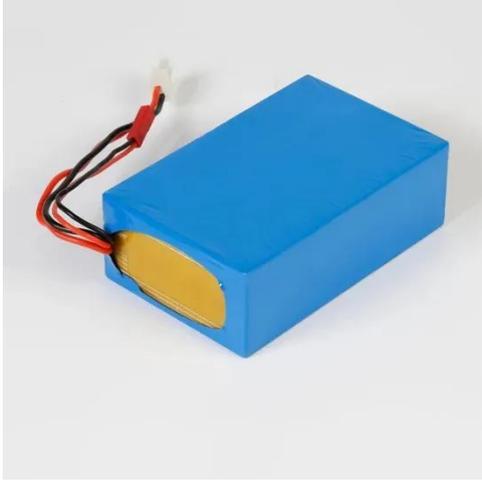

The key to understanding the requirements outlined in NFPA 110 lies in acquainting yourself with the way emergency power supply systems (EPSS) are classified: By Level, Class and Type. Dictates performance standards your system needs to follow. Duration your system must be able to run without refueling.

What is an emergency power supply system (EPSS)?

Your emergency power supply system (EPSS) refers to your functioning backup power system in its entirety. It includes the EPS, transfer switches, load terminals and all the equipment required to provide a safe and reliable alternative source of power for your facility (3.3.4).
