## Overview

---

Why is ports of Stockholm investing in onshore power?

The investment in onshore power is part of Ports of Stockholm's long-term environmental and sustainability work and contributes directly to the EU's climate goal Fit for 55. The goal is to reduce the union's carbon dioxide emissions by at least 55% by 2030.

How will the port of Stockholm meet EU regulations?

Staffan Forsell, Chief Strategy and Development Officer at Ports of Stockholm, commented: "We are working strategically to meet EU regulations that require an onshore connection for ships by 2030. This places high demands on the electricity grid, especially in Port of Kapellskär where the current capacity is limited.

What is the Stockholm Norvik port project?

Ports of Stockholm's part in the project involves connecting container vessels to green electricity at Stockholm Norvik Port from 2027. The port, which was officially inaugurated in 2023, was already prepared for this purpose at the time of construction which means that the infrastructure to some extent already is in place.

Is Stockholm a sustainable cruise destination?

To remind, Ports of Stockholm recently inaugurated 'Sweden's first' onshore power connection for international cruise ships, improving the region's position as a sustainable cruise traffic destination.
