# Suggestions for Egypt s energy storage power station

## Overview

---

Why is Egypt deploying battery storage?

Egypt's electricity and renewable energy minister, Mahmoud Esmat, said that deploying battery storage was central to the country's strategy to maximise renewable energy potential. The project is meant to meet peak energy demand and stabilise the grid as more solar and wind power is added.

Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.

What is AMEA power doing with Egypt?

The UAE renewable energy company Amea Power has signed an agreement with the state-run Egyptian Electricity Transmission Company to develop two battery storage facilities with a total capacity of up to 1,500 megawatt-hours (MWh).

Does Scatec have a solar project in Egypt?

In a separate announcement, Norway's Scatec said it had signed a 25-year PPA with Egyptian Electricity Transmission Co. (EETC) for a 1 GW solar and 100 MW/200 MWh battery storage hybrid project in Egypt. "This will be the first hybrid solar and battery project in Egypt," said Scatec CEO Terje Pilskog.

## Suggestions for Egypt s energy storage power station

### Energy storage systems impact on Egypt's future energy mix

...

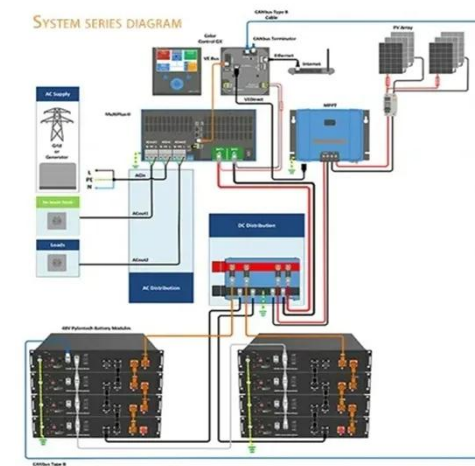

This study focuses on the role that the energy storage systems including (pumped hydro power, redox flow and lithium-ion batteries and hydrogen energy) may play in an ...
