Swiss PV combiner box prices

Overview

What is a 'combiner box' in a solar PV system?

A "Combiner Box" in the context of a solar PV system is to combine the output of several solar strings together. When a solar power system consists of more than one "string", each input string is connected to a fuse terminal.

What is a use combiner box?

The use combiner box is essential equipment for all photovoltaic systems. It is considered the interface between the solar inverter and solar panels. The users and installers have also access to a safe control cabinet that isolates the power between live components. The SPD (DS50PV-500/51, DS50PV-1000/51) from renowned.

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

How to choose a PV combiner box?

The overall size and weight of the pv combiner box should be fully considered according to the location. The environment temperature of combined box installation should be between -25°C+60°C, and the relative humidity should be between 0-95%. It should be installed in a dry, well-ventilated and dust-proof place.
