

**EQACC SOLAR**

# **Symmetrical supercapacitor solar container price**

**Highvoltage Battery**

## Overview

---

What is photocapacitor?

Photocapacitor is integrated with perovskite solar cell and symmetrical supercapacitor. The energy matching between the conversion unit and the storage unit is harmonized. Photocapacitor achieves milestone conversion storage efficiency as high as 20.53 %. Photo-electron-chemical process and efficiency in device are clarified and defined.

How efficient is photocapacitor?

Photocapacitor achieves milestone conversion storage efficiency as high as 20.53 %. Photo-electron-chemical process and efficiency in device are clarified and defined. Solar energy is clean, open, and infinite, but solar radiation on the earth is fluctuating, intermittent, and unstable.

What is integrated photocapacitor (IPC)?

Using perovskite solar cell as energy conversion unit and symmetrical supercapacitor as energy storage unit, an integrated photocapacitor (IPC) is designed.

What is solar energy conversion & storage integrator?

Solar energy conversion and storage integrator concept can be traced back to 1976, when Hodes et al. used polycrystalline CdSe as photoelectrode, which allowed the storage of the converted energy *in situ* for subsequent use .
