Tax on bifacial solar panels

Overview

Will bifacial solar panels be exempt from tariffs?

In his announcement, the President included an exemption for bifacial solar panels. This decision comes after the ITC recommended in November 2021 to extend the safeguard tariffs for an additional four years. Proclamations.

What is a bifacial solar tariff?

This measure aims to support the announced 125 GW of solar module assembly manufacturing capacity without stifling emerging solar cell production. Bifacial solar panels, which are predominantly used in commercial, industrial, and utility-scale solar power projects, were previously exempt from tariffs.

Are bifacial solar modules exempt from Section 201 tariffs?

WASHINGTON, D.C. — In a win for the solar industry, the U.S. Court of International Trade (CIT) re-instated the exclusion of bifacial solar modules from the Section 201 tariffs. Originally granted in June 2019, the exclusion for bifacial modules was revoked by the Trump Administration in October 2020.

Did Biden put bifacial solar panels back under Sec 201 tariffs?

The Biden Administration today put imported bifacial solar panels back under Sec. 201 tariffs, after the specialty solar panels enjoyed a two-year exemption from extra duties first initiated by President Biden in 2022.
