Telsa solar container battery

Overview

Does Tesla have a Megapack battery storage solution?

Image: Intersect Power Tesla has agreed to supply US solar PV and energy storage developer Intersect Power with 15.3GWh of its Megapack battery storage solution.

Will Tesla supply a containerised battery energy storage system to intersect power?

The electric vehicle (EV) and energy tech company, due to announce its financial results next week on 23 July, will supply the containerised battery energy storage system (BESS) technology to Intersect Power through 2030. The deal was announced in a short social media post by Tesla, which famously doesn't engage with the press.

How big is Tesla's Energy Storage shipments for 2023?

To give an idea of scale for the latest deal, Tesla's full-year energy storage shipments for 2023 totalled 14.7GWh. The company's Megapack factory in Lathrop, California, is scheduled to ramp up to 40GWh annual production capacity by the end of 2024, according to the company in its Q1 2024 results announcement.

Why did arevon choose Tesla's Megapack 2 XL battery storage system?

Tesla's Megapack 2 XL Battery Storage System Arevon selected Tesla's increasingly popular Megapack 2 XL battery energy storage system (BESS) for the Condor project. Tesla is facing high demand for the utility-scale system, necessitating a second Megapack factory currently under construction in China.
