# Temporary mobile power supply level 3 power box on construction site

## Overview

---

Temporary power for construction sites is a temporary electrical infrastructure that supplies power to construction equipment, tools, lighting and other necessary facilities during the construction phase.

What is a temporary power box?

A temporary power box, also known as a power spider box, is a portable electrical enclosure that provides temporary electrical power distribution on construction sites and other remote locations. It serves as a hub for connecting various electrical loads and distributing power safely and efficiently.

What is Langsung mobile temporary power supply?

Langsung's Mobile Temporary Power Supply Device offers safe, efficient, and standardized power access for construction projects. Features 10.5kV voltage, up to 315kVA capacity, IP33 protection, and weather resistance. Reusable, hoistable, and seasonally independent—reduces project cost by up to 40%. Trusted by construction firms globally.

What is temporary electrical supply?

Temporary Electrical Supply Temporary supplies for construction sites often present challenges when the power requirements are estimated. Provision needs be made for temporary supply cables to be terminated in a safe, secure and robust way.

Do construction sites need a temporary power supply?

Since construction sites are not yet connected to the main grid, they require a temporary power supply. It's vital to quickly set up temporary electrics on-site so that work can begin immediately. Our comprehensive range of temporary power solutions will get your site up and running in no time at all.
