

## EQACC SOLAR

# Ten MW battery energy storage project

### ESS

**AI-W5.1-B (Battery Module)**

**AI-W5.1-PDU3-B**

**AI-W5.1-Base (Battery Base)**

## Overview

---

How does the 10 MW battery storage project improve grid stability?

The 10 MW battery storage project enhances grid stability by: **Energy Buffering:** Balancing supply and demand during peak periods. **Backup Power:** Providing emergency power in case of grid failures. The project supports renewable energy integration by: **Storing Renewable Energy:** Capturing excess energy from wind and solar sources.

What is a 10 MW battery storage system?

The 10 MW battery storage project utilizes a modular design approach: **Battery Units:** Each unit is 2.5 meters x 2 meters x 2.2 meters, featuring high-density lithium-ion batteries with a capacity of 67 kWh. **Inverter System:** Advanced inverters are used, with each managing up to 1 MW, crucial for the 10 MW battery storage system's efficiency.

How many inverters can support a 10 MW battery storage system?

**Total Storage Capacity:** 20 MWh, supporting the 10 MW battery storage system. **Inverters:** 10 inverters, each handling 1 MW. **Installation Timeline:** From March 2023 to March 2024. For detailed information about the 10 MW battery storage project, visit [Maxbo Solar's project page](#).

What are the safety measures for the 10 MW battery storage project?

The safety measures for the 10 MW battery storage project include: **Fire Alarm System:** High-sensitivity smoke and temperature sensors. **Fire Suppression Systems:** Automatic sprinklers and manual extinguishers. For insights into different battery storage designs, refer to [Energy Storage News](#). 3.
