# **Tender for wind power expansion of Helsinki solar container communication station**

## Overview

---

When will Finland launch its first offshore wind tender?

The President of Finland has signed a bill that enables the country to organise its first tender for offshore wind development in the exclusive economic zone (EEZ). With the new legislation set to enter into force on 1 January 2025, the government is looking to launch the first offshore wind tender in the autumn of next year.

When will offshore wind power be available in Finland?

The Finnish government plans to hold a tender for offshore wind power areas in the country's exclusive economic zone, expecting bidding to be launched at the end of 2025, at the earliest. Offshore wind turbines. Source: LICEngineering ().

When will competitive tendering take place in Finland?

"The Energy Authority can organise competitive tendering once the Government has decided which areas will be tendered. This will take place towards the end of 2025, at the earliest", Finland's Ministry of Economic Affairs and Employment states.

What is a Finnish offshore wind tender?

Under the newly enacted legislation, Finnish offshore wind tender consists of three parts: the government selecting the offshore wind areas, the Energy Authority organising the competitive tendering for the area, and the selection of the tender winner (s) which are granted the exclusive right to apply for a permit for a certain area.
