The cost price of solar glass

Overview

Solar panel glass costs can fluctuate depending on several key factors including quality, thickness, and manufacturer, typically falling within a range of \$5 to \$20 per square foot, with commercial applications potentially incurring additional expenses. How much does PV glass cost per square meter?

The cost of PV glass per square meter currently averages at \$6. Considering that double-glass PV modules use glass on both sides, the cost of glass alone doubles if compared to glass-foil solar panels. A benefit of most glass-glass solar panels is that they are frameless, which reduces their price.

What are PV solar cell glass price developments?

This post is a summary of the PV solar cell glass price developments. The price developments of PV solar cell glass are expressed in US\$ prices converted FX rates applicable at the time when the price was valid. PV solar cell glass price index developments are calculated from multiple separate sources of data to ensure statistical accuracy.
