The distance between the UPS head and the battery cabinet

Overview

How to install a UPS battery cabinet?

Make the ground connection at one of the screws on the battery cabinet; to ensure a good connection, remove the paint under the cabinet screw. Do not make the UPS ground connection yet. 3. Place the batteries in the cabinet according to the installation diagram that came with the batteries.

How do you install a battery cabinet?

Align the cables on the battery terminals so that the cable lug will not contact any part of the cabinet even if the battery is moved. Keep the cable away from any sharp metal edges. Install the battery cables so they cannot be pinched by the battery cabinet or UPS doors. BATTERY CABINET INSTALLATION.

Where should the rbc-1 Battery Cabinet be mounted?

Place the RBC-1 battery cabinet directly below the UPS. If you have two or more battery cabinets, you should have one RBC-1 and one or more RBC-2 battery cabinets. The RBC-2 battery cabinet(s) MUST be mounted between the UPS and the RBC-1 battery cabinet. UPS RBC-1 RBC-2 RBC-1 UPS Figure 5. RBC-1 and RBC-2 Rack Configuration.

How do I check the voltage between Battery Cabinet & ups?

The cable between the battery cabinet and UPS should be connected at the battery cabinet, but still disconnected at the UPS. Check the polarity and voltage between the positive (+) and negative (-) terminals. The measurement should be acceptable for your model's nominal voltage (see Table 23).

The distance between the UPS head and the battery cabinet

Installation Environment and Clearance Requirements

Do not install the UPS in environments with conductive metal scraps in the air. The optimal operating temperatures for valve-regulated lead-acid (VRLA) batteries are 20-30°C. Operating ...

PowerXpert 9395 UPS 550 kVA installation and ...

C A U T I O N If Eaton battery cabinets are located in the same room as the UPS, the battery cabinet environmental requirements supersede the UPS requirements. Operating ...
