**The most cost-effective UPS
uninterruptible power supply**

Overview

What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

What is the best ups?

With these factors in mind, here are our favorite UPSs for every price point and use case. Our pick for the best UPS overall goes to the APC BR1500G Backup Battery. At 1500VA/865W, it can power most devices, including computers, external hard drives, and wireless routers, from a few minutes to several hours, depending on the total connected load.
