## Overview

---

How much solar power does the Netherlands have?

Solar power in the Netherlands has an installed capacity of around 23,904 megawatt (MW) of photovoltaics as of the end of 2023. Around 4,304 MW of new capacity was installed during 2023. Market research firm GlobalData projects Dutch solar PV capacity could rise to 55,000 MW (55 GW) by 2035.

How big is residential solar PV in the Netherlands?

The average size of residential solar PV systems is estimated to be 4.69 kW moving to 2030. The technical potential for residential solar PV in the Netherlands is estimated at 13,945 MW. The payback time for residential Solar PV in the Netherlands is 9.7 years as of 2015.

Are solar panels a good investment in the Netherlands?

An average-sized installation of 12 solar panels produces about 4000 kWh a year when you are buying solar panels in the Netherlands. With electricity prices at 30 cent p. kWh, that's € 1200,- saved. An installation of € 5500,- means an RUI of less than 5 years. There are very few investments which are this safe with the same RUI.

What is the largest solar installation in the Netherlands?

2016 The largest solar installation in the Netherlands, the 6 MW array at the Wadden-Island Ameland was officially opened in June 2016. Installed capacity per capita rose to 120.1 W, thirteenth position in the EU and nearer to the EU average of 197.8 W than in preceding years.

## The proportion of solar glass costs in the Netherlands

---

### Solar glass now the largest contributor to PV module costs

Solar glass has become the largest part of solar PV manufacturing costs. The industry is dominated by 8 Chinese glass suppliers with 90% share.
