# There are several battery cabinet factories in Warsaw

## Overview

---

How is the battery storage industry changing in Poland?

The Battery Storage industry in Poland is rapidly evolving, driven by the increasing demand for renewable energy and the need for grid stability. Key considerations include the regulatory environment, which is influenced by both European Union directives and national energy policies aimed at promoting sustainable practices.

Why should you invest in a battery factory in Poland?

Today, Poland emerges as a strategic destination for investment in battery factories, attracting the attention of European companies with a highly qualified workforce that includes engineers, scientists, and electromobility specialists.

Why is Poland becoming a magnet for battery factories?

Poland is rapidly becoming a magnet for investments in battery factories thanks to its skilled workforce and government programmes promoting electromobility. Which companies are driving this transformation and what is their impact on the industry?

Who makes a battery in Poland?

In fact, major industry players such as LG Energy Solutions and Umicore, have established a strong presence there. According to a McKinsey report, the Polish nation ranks second globally in battery production capacity, following China, with 73 GWh in 2022.
