

**EQACC SOLAR**

# **Tianhan solar panel models and sizes**

## Overview

---

What are the dimensions of standard solar panels?

Most solar panels are about 1.5 inches thick. The typical classification of solar panel sizes is based on the solar cell size, but it's not very useful for most calculations.

What are the dimensions of a 96-cell solar panel?

96-cell solar panel size. The dimensions of 96-cell solar panels are 41.5 inches long and 63 inches wide. That's a 41.5×63 solar panel.

What is the typical thickness of solar panels?

Most solar panels are about 1.5 inches thick. The thickness (depth or height) is the only dimension that varies slightly among different solar panel models. The length and width of typical solar panels, along with their wattage and area or square footage, are also important factors to consider.

How big is a silk Nova solar panel?

Equipped with 108 pieces of 182 mm size multi-busbar half-cut cells, the double-glass module measures 1,722 x 1,134 x 30 mm. Featuring a green glass and an aluminum frame, the company says the module is best suited for 'invisible' greenfield installations and PV fences. The Silk Nova series is also available in other colors – red, and silver.
