Timor-Leste 5g outdoor base station distributed power generation

Overview

How much did Timor-Leste invest in a new power system?

Timor-Leste's power stations and distribution lines, showing the Power Distribution Modernisation Project. The initial capital investment in the new power system was reported as US\$2 billion for the main power stations and distribution lines.

Does Timor-Leste have electricity?

Stakeholders confirmed that the state delivers Timor-Leste's national electricity supply, with no private actors involved. The electricity system's power stations and transmission lines, including those being modernised through assistance from the Asian Development Bank , are shown in Fig. 4.

Does improved electricity access improve development outcomes in Timor-Leste?

Overall, Timor-Leste's HDI has shown little improvement since 2010, while electricity access doubled to 100 %. The effects of improved electricity access on development outcomes appear less than observed internationally. Fig. 3. Timor-Leste's HDI component indices 2000-2021.

Does geopolitics influence Timor-Leste's energy reconstruction?

Totalling 280 MW, the national generation capacity is much greater than the current national peak load of 70 MW. It was commented that the two largest power stations were second-hand generators installed through a partnership with China, highlighting the influence of geopolitics in Timor-Leste's energy reconstruction. Fig. 4.

Timor-Leste 5g outdoor base station distributed power generation

5G Distributed gNB

nCELL-RU4460 (4x40W): a high output power radio frequency unit (RRU) for 5G NR outdoor base stations. It forms a complete 5G base station together with the baseband unit (BBU), ...
