Overview

How much does solar energy cost in Japan?

Solar electricity has gained significant traction in Japan due to its push for renewable energy sources. 1. The initial cost of solar panel installation can range from ¥1,000,000 to ¥2,800,000 based on system size and technology, 2. Incentives and subsidies are available to offset costs, potentially reducing out-of-pocket expenses by 30% to 40%, 3.

Where can I find information about solar power installation in Tokyo?

The Tokyo Metropolitan Government's Bureau of Environment's solar power portal site provides detailed explanations of not only the "subject of the mandatory installation," but also the implementation date of the program (April 2025), "benefits of installing PV system," "actual costs," and other details.

Should you install solar panels in Tokyo?

Installing solar panels not only reduces monthly electricity bills but also ensures power availability during outages. Check the conditions and see how much subsidy you can receive. Tokyo will require solar panel installation on new homes starting April 2025.

Will Tokyo subsidize solar panels?

In March last year, the Tokyo Metropolitan Government established a 150 billion yen fund to subsidize the installation of solar power generation equipment for Tokyo residents. Subsidies will be provided if solar panels are installed during the construction of new eco-friendly houses or while retrofitting existing houses with insulation.
