

EQACC SOLAR

Tonga Off-Grid solar System

Overview

Tonga is making tangible progress toward its renewable energy targets with the rollout of solar-powered mini-grid systems across its outer islands, in a bold move to reduce its dependence on expensive diesel imports and improve electricity access for remote communities. What is the Tonga solar project?

1. The project will construct and install solar power systems with a total capacity of 1.32 MWp on the outer islands of Tonga, and the existing grid network on the islands of Vava'u and 'Eua rehabilitated by TPL. (The rehabilitated grid network portions on Vava'u and 'Eua are expanded). 2.

What is solar power in Tonga?

The solar PV system is part of a 1.25 MW portfolio, where power will be sold to the island's villagers through pre-paid net metering. The Asian Development Bank, with the help of other institutions, is supporting the deployment of solar on the Pacific Ocean's small island nations. Tonga has a goal of 50% renewable energy by 2020 and 70% by 2030.

Is Tonga ready for a solar mini-grid?

Tonga has a goal of 50% renewable energy by 2020 and 70% by 2030. Tonga's most remote island, Niuatoputapu, is all set for the development of a new solar mini grid. The King of Tonga, Tupou VI, led a groundbreaking ceremony for the solar PV array which will connect to 210 homes.

How does the Tonga solar plant work?

Once operational, the solar plant will sell its electricity to Tonga's power utility, Tonga Power Limited (TLP), through a subsidized tariff, which is assessed by the ADB for each project. The island's citizens purchase the electricity through prepaid metering.

Tonga Off-Grid solar System

Top Off Grid Inverters Wholesalers Suppliers in Tonga

Wholesale Off-Grid Inverters PV System?
An off-grid solar system, also known as off-the-grid or standalone, is a photovoltaic system that has no access to the utility grid. For ...
