## Overview

---

What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

Is Tesla's Energy Storage megafactory a good example of cooperation?

A night view of Tesla's energy storage Megafactory in Shanghai, Decem. /CFP  
U.S. carmaker Tesla's Shanghai energy storage Megafactory has begun trial production, serving as a good example of cooperation between China and the United States to address climate challenges.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Where is Tesla's Energy Storage megafactory?
