UPS battery cabinet and UPS distribution cabinet

Overview

Where are the cabinets in the UPS system placed?

Each cabinet in the UPS system is placed in its final installation location. The UPS (Uninterruptible Power Supply) and MBC (Main Battery Cabinet) must be installed on a level floor suitable for computer or electronic equipment. The MBC (Main Battery Cabinet) is bolted to the floor for permanent installations. All conduits and cables are properly routed to the MBC.

How to choose UPS battery cabinets?

Furthermore, the cabinets need to offer removable hinged doors so that the UPS system can be easily accessed. Doors need to be locked for safety and security. UPS Battery Cabinets have to be designed to house most front terminal batteries. Your UPS Battery Cabinets should have removable side panels so that cables can be easily installed.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

What is a battery cabinet?

A battery cabinet is a housing designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet. Lithium-ion 34.6 kWh-parallel up to 5 MW.
