US professional solar panel prices

Overview

How much do solar panels cost?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer.

How much does a roof solar panel system cost?

The cost of expanding a roof solar panel system depends largely on the number of solar panels. Typically, homeowners need to pay around \$1000 for the installation (including plans and permits) and then around \$500-\$700 per new panel.

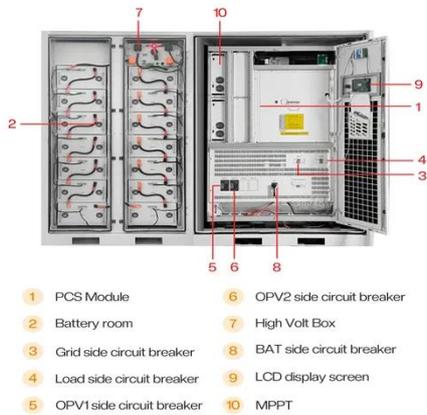

How much does a commercial solar system cost?

Costs vary by region, installer, and complexity. For commercial buildings, solar panels average \$2.00 per watt, with a 100 kW system potentially offsetting the entire electricity bill. The initial cost for commercial solar setups is around \$200,000 before incentives.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.
